

## OrangeHRM, Leading Open Source HRM Solution

OrangeHRM is a project that started about three years ago and has grown significantly since then. Today the project reached more than 230,000 downloads, were elected the "Project of the month" in December 2008 by Sourceforge.net and listed at the top 10 projects list.

OrangeHRM is Leading Open Source HRM that offers a flexible and easy to use solution for small and medium sized companies free of charge. By providing modules for personnel information management, employee self service, leave, time & attendance, benefits and recruitment companies are able to manage the crucial organization asset – people. The combination of these modules into one application assures the perfect platform for re-engineering and aligning your HR processes along with the organizational goals.

"With a great community collaborating on OrangeHRM, the solution have been translated to 12 different languages and have customers all over the world", told us Carlos Ricci - Marketing Team OrangeHRM Inc, he added "we are helping many companies around the world to acquire a both free and comprehensive HRM system. This is a good choice for companies in this financial crisis time, once HR is the first area to have cut in the budget and Open Source products enable them to save money and keep investments."
